DETAILED ACTION

1. Claims 1-20 are presented for examination.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 11-03-03 is being considered by the examiner.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1, 6, 11, and 16 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 3, 6, 8, and 11 respectively of prior U.S. Patent No. 6,816,933. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2112

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 2, 7, 12, and 17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2, 5, and 13 of U.S. Patent No. 6,816,933 in view of Eriksson et al. (6,148,076) (hereinafter Eriksson).

The claims are related to one another as follows:

Application	Patent
2	2
7	5
12	5
17	13

With respect to those claims, the only difference is that the patent claims do not explicitly disclose the serial devices being subscriber line interface circuits (SLICs). Eriksson teaches SLICs (at least col. 1, lines 12-38). It would have been obvious to one of ordinary skill in the art at the time the invention was made to implement SLICs as taught by Eriksson in the system of Patent No. 6,816,933 to provide integrated telephone line circuit in modern telephone systems which replaces a line transformer used in earlier systems (col. 1, lines 13-18).

Allowable Subject Matter

Art Unit: 2112

5. Claims 3-5, 8-10, 13-15, 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, as the art discloses serially programmable devices:

US Patent 5,319,598 Aralis et al.
